

Sterilex® is a leader in developing proprietary antimicrobial products for biofilm removal and microbial control. Sterilex® provides specialty disinfectants, biofilm control biocides, and cleaning products for food processing, animal health, water treatment, and industrial applications.

Sterilex®

## ANIMAL HEALTH *BIOSECURITY*

### Sterilex PerQuat® Waterline Disinfectants

- Removes organics and kills resistant organisms found in waterlines.
- Based upon PerQuat® technology with products approved to “penetrate and remove biofilm” from water systems.
- Prevents plugging of lines and nipple-drinkers.
- More cost-effective and efficacious than competitive products.

**PERQUAT** Technology

Available in both liquid and powder.

### Sterilex® PerQuat® Environmental Sanitation

- Liquid and powder products can be applied as multi-purpose disinfectant cleaners and sanitizers to eliminate resistant organisms from farm premises and enhance biosecurity.
- Effective against a wide array of poultry and swine pathogens.

### Sterilex® Ultra Powder Dry Sanitizer

- EPA registered dry sanitizer approved to kill organisms such as Salmonella on boots and floor surfaces.
- Can be applied to any floor surface to control organisms throughout the premises and prevent contamination.
- Remains effective longer than competitive products.
