

ANIMAL HEALTH BIOSECURITY

Sterilex understands the unique microbial challenges that impact commercial production operations and disease risks associated with animal health. From poultry and swine farms to hatcheries and animal transportation, our innovative cleaning and disinfection solutions are indispensable to biosecurity practices. Sterilex products include proprietary multi-purpose disinfectant cleaners and sanitizers as well as hygiene monitoring tools. Sterilex provides EPA-registered products for foot pan and boot treatments to eliminate resistant organisms such as *Avian Influenza*, *PEDv* and *Salmonella enteritidis* in high risk locations and systems.

WATERLINE DISINFECTION

Sterilex offers the most effective waterline treatment products on the market. Our products efficiently remove organics and kill resistant organisms found in waterlines. This creates a cleaner, safer water source for animal populations.

Benefits:

- Removes organics and kills resistant organisms found in waterlines
- Prevents plugging of lines and nipple-drinkers
- Leads to higher animal livability rates and greater yields as a result of drinking uncontaminated water
- More cost-effective and efficacious waterline cleaner than competitive products (based upon University of Arkansas studies)

ENVIRONMENTAL SANITATION

Sterilex products are used as superior cleaners and disinfectants to eliminate resistant organisms from farm premises and enhance animal biosecurity. Our liquid and powder products can be applied as a foam or spray to a wide variety of applications including farm premises, hatcheries and transportation vehicles. Based on Sterilex proprietary PerQuat® Technology, our products have the ability to kill resistant pre-harvest pathogens such as *Salmonella enteritidis*, *Avian Influenza* and *PEDv*.

Benefits:

- Effective against a wide array of poultry and swine pathogens
- Prevents the spread of pathogens such *Salmonella enteritidis*, *Avian Influenza* and resistant swine pathogens such as *PEDv*
- Provides one-step cleaning and disinfection to prevent and control organism growth in high-risk environments

SOLID FOOT PAN AND BOOT SANITIZATION

Sterilex offers the only EPA-registered solid sanitizer on the market that can be used in foot pans and as a boot sanitizer. In entryways, barns and hatcheries, our powder product can be applied directly to floors to prevent the spread of resistant pathogens such as *Salmonella enteritidis*, *Avian Influenza* and *PEDv* via foot traffic. Used to treat high-risk areas in animal environments, our powder product offers an alternative to liquid foot baths for poultry and swine disinfection. The use of this entryway sanitizer prevents organism growth and spread of disease thereby enhancing biosecurity.

Benefits:

- Specific approval for use in foot pans, foot baths and as a boot sanitizer
- The only product on the market that EPA has approved for use as a solid foot pan/boot sanitizer
- EPA-registered disinfectant and foot pan/floor surface sanitizer approved to kill a wide variety of animal health pathogens including:
 - o *Avian Influenza*
 - o *PEDv*
 - o *Listeria*
 - o *E.coli*
 - o *Salmonella enteritidis*
 - o *Salmonella enterica*
 - o *Staph aureus*
 - o *Enterobacter*
